

CONTENTS

Preface xiii

■ CHAPTER 1 Vectors 1

- 1 Coordinate Vectors 1
- 2 Geometric Vectors 8
 - A Points and Vectors 8
 - B Distance and Length 10
 - C Scalar Multiplication 11
 - D Vector Addition 13
 - E Points, Arrows, and Vectors 14
- 3 Lines and Planes 17
 - A Lines 18
 - B Planes 21
- 4 Dot Products 24
 - A Lengths and Angles 25
 - B Properties of $x \cdot y$ and $|x|$ 27
 - C Unit Vectors and Projections 28
- 5 Euclidean Geometry 33
 - A Equations for Lines and Planes 33
 - B Distance to a Line in \mathbb{R}^2 or a Plane in \mathbb{R}^3 35
- 6 The Cross Product 37

■ CHAPTER 2 Equations and Matrices 46

- 1 Systems of Linear Equations 46
 - A Elimination Method 46
 - B Applications 52
- 2 Matrix Methods 59
 - A Matrix Equations and Elementary Operations 59
 - B Reduced Matrices 64

	C	Homogeneous Systems	65
	D	Geometry of Solution Sets	70
3		Matrix Algebra	74
	A	Sum and Scalar Multiple	74
	B	Matrix Multiplication	75
	C	Identity Matrices	78
	D	Matrix Polynomials	79
4		Inverse Matrices	81
	A	Invertibility	81
	B	Computing Inverses	83
	C	Special Matrices	85
5		Determinants	88
	A	Definition	88
	B	Row and Column Expansions	91
	C	Basic Properties	92
	D	Computing Determinants	94
	E	Invertible Matrices	96

■ CHAPTER 3 Vector Spaces and Linearity (Optional Chapter) 102

1		Linear Functions on \mathbb{R}^n	102
	A	Matrix Representation	102
	B	Composition	107
	C	Inverse Functions	108
2		Vector Spaces	112
	A	Examples of Vector Spaces	112
	B	Subspaces	114
3		Linear Functions	119
	A	Examples of Linear Functions	120
	B	Composition and Linear Combination	123
	C	Inverse Functions	124
4		Image and Null-Space	126
	A	Image	126
	B	Null-Space	127
	C	Nonhomogeneous Equations	129
5		Coordinates and Dimension	131
	A	Bases and Coordinates	132
	B	Linear Functions	134
	C	Dimension Theorems	139
6		Eigenvalues and Eigenvectors	143
	A	Definitions and Examples	143
	B	Bases of Eigenvectors	148
	C	Changing Coordinates	153

- 7 Inner Products 155
 - A General Properties 155
 - B Orthogonal Bases 159
 - C Rotation and Reflection 168

■ CHAPTER 4 Derivatives 173

- 1 Functions of One Variable 174
 - A Derivatives 174
 - B Velocity and Speed 179
 - C Higher-Order Derivatives; Acceleration 181
 - D Arc Length 181
 - E Computer Plotting of Space Curves 184
 - F Vector Integration 185
- 2 Several Independent Variables 189
 - A Graph of a Function 189
 - B Level Sets 190
 - C Computer-Generated Graphs 193
 - D Quadric Surfaces 196
- 3 Partial Derivatives 198
 - A Definition 198
 - B Geometric Interpretation 200
 - C Continuity 201
- 4 Parametrized Surfaces 205
 - A Vector Partial Derivatives 205
 - B Quadric Surfaces 209
 - C Computer Plotting of Image Surfaces 212

■ CHAPTER 5 Differentiability 216

- 1 Limits and Continuity 216
 - A Neighborhoods 217
 - B Limits 218
 - C Continuity 221
- 2 Real-Valued Functions 225
 - A Differentiability and Continuity 225
 - B Tangent Approximations 230
- 3 Directional Derivatives 232
 - A Definition 232
 - B Mean-Value Theorem 235
- 4 Vector-Valued Functions 237
 - A Differentiability 237
 - B The Derivative Matrix 239
 - C Tangent Approximations 241
- 5 Newton's Method 245

■ CHAPTER 6 Vector Differential Calculus 252

- 1 Gradient Fields 252
 - A Basic Properties 252
 - B Chain Rule 254
 - C Normal Vectors 256
 - D Plotting Vector Fields; Flow Lines 259
- 2 The Chain Rule 261
 - A General Formula and Examples 263
 - B Changing Variables 271
- 3 Implicit Differentiation 275
- 4 Extreme Values 283
 - A Critical Points 283
 - B Constraints 286
 - C Lagrange Multipliers 287
 - D Saddle Points 291
 - E Second-Derivative Criterion 293
 - F Steepest Ascent Method 298
- 5 Curvilinear Coordinates 303
 - A Polar Coordinates 303
 - B Spherical Coordinates 305
 - C Cylindrical Coordinates 306
 - D Jacobian Matrices 306

■ CHAPTER 7 Multiple Integration 312

- 1 Iterated Integrals 312
 - A Integration over a Rectangle 312
 - B Nonrectangular Regions 315
 - C Higher Dimensions 318
 - D Solids with Known Sectional Areas 320
- 2 Multiple Integrals 322
 - A Definition 322
 - B Existence 325
 - C Double Integrals 327
 - D Triple Integrals 330
 - E Content and Mass 331
- 3 Integration Theorems 333
- 4 Change of Variable 338
 - A Polar Coordinates 338
 - B Spherical Coordinates 339
 - C Cylindrical Coordinates 340
 - D Jacobi's Theorem 342

- 5 Centroids and Moments 348
- 6 Improper Integrals 353
- 7 Numerical Integration 359
 - A Midpoint Approximations 360
 - B Simpson Approximations 361

■ CHAPTER 8 Integrals and Derivatives on Curves 367

- 1 Line Integrals 367
 - A Definition and Examples 367
 - B Fundamental Theorem of Calculus 374
- 2 Weighted Curves and Surfaces of Revolution 377
- 3 Normal Vectors and Curvature 383
- 4 Flow Lines, Divergence, and Curl 386

■ CHAPTER 9 Vector Field Theory 397

- 1 Green's Theorem 397
 - A Statement and Examples 397
 - B Changing Paths 402
 - C Physical Interpretations 404
- 2 Conservative Vector Fields 409
 - A Potentials 409
 - B Path Independence 412
 - C Derivative Criterion 413
 - D Indefinite Integration 417
- 3 Surface Integrals 419
 - A Normal Vectors 419
 - B Area and Mass 420
 - C Integrating Vector Fields 423
 - D Orientation 426
- 4 Gauss's Theorem 431
 - A Statement and Examples 431
 - B Interpretation of Divergence 435
- 5 Stokes's Theorem 438
 - A Statement and Examples 438
 - B Interpretation of Curl 442
 - C Simple Connectedness 446
- 6 The Operators ∇ , $\nabla \times$ and $\nabla \cdot$ 449
 - A Derivative Formulas 449
 - B Green's Identities 451
 - C Changing Coordinates 453

■ CHAPTER 10 First-Order Differential Equations 460

- 1 Direction Fields 460
 - A Plotting Direction Fields 461
 - B Numerical Methods 467
- 2 Applications 469
 - A Direct Integration 469
 - B Separation of Variables 470
- 3 Linear Equations 480
 - A Exponential Integrating Factors 481
 - B Applications 483

■ CHAPTER 11 Second-Order Equations 490

- 1 Differential Operators 490
 - A Examples 490
 - B Factoring Operators 494
- 2 Complex Solutions 500
 - A Complex Exponentials 500
 - B Higher-Order Equations 507
 - C Independent Solutions 508
- 3 Nonhomogeneous Equations 513
 - A Superposition 513
 - B Undetermined Coefficients 517
 - C Variation of Parameters 521
 - D Green's Functions 525
- 4 Oscillations 530
 - A Harmonic Oscillation 531
 - B Damped Oscillation 532
 - C Forced Oscillation 535
- 5 Laplace Transforms 540
- 6 Convolution 548
- 7 Nonlinear Equations 553
 - A Dependent Variable Absent: $\ddot{y} = f(t, \dot{y})$ 554
 - B Independent Variable Absent: $\ddot{y} = f(y, \dot{y})$ 555
 - C Phase Space 558
- 8 Numerical Methods 562
 - A Euler's Method 563
 - B Improved Euler Method 564

■ CHAPTER 12 Introduction to Systems 571

- 1 Vector Fields 571
 - A Geometric Interpretation 571
 - B Autonomous Systems 575

- C Second-Order Equations 576
- D Existence, Uniqueness, and Flows (Optional) 580
- 2 Linear Systems 585
 - A Elimination Method 585
 - B Nonstandard Forms 588
- 3 Applications 594
- 4 Numerical Methods 606
 - A Euler's Method 607
 - B Improved Euler Method 608

■ CHAPTER 13 Matrix Methods 617

- 1 Eigenvalues and Eigenvectors 617
 - A Exponential Solutions 617
 - B Eigenvector Matrices 620
- 2 Matrix Exponentials 625
 - A Definition 625
 - B Solving Systems 627
 - C Relationship to Eigenvectors 629
 - D Computing e^{tA} in Practice 631
 - E Independent Solutions 637
- 3 Nonhomogeneous Systems 640
 - A Solution Formula 640
 - B Variation of Parameters 641
 - C Summary of Methods 643
- 4 Equilibrium and Stability 645
 - A Linear Systems 647
 - B Nonlinear Systems 653

■ CHAPTER 14 Infinite Series 660

- 1 Examples and Definitions 660
- 2 Taylor Series 664
 - A Taylor Polynomials 664
 - B Convergence of Taylor Series 667
- 3 Convergence Criteria 670
 - A Convergence of Sequences 670
 - B Sums and Multiples of Series 672
 - C Series with Nonnegative Terms 674
 - D Absolute Convergence 677
 - E Alternating Series 680
- 4 Uniform Convergence 682
- 5 Power Series 688
 - A Interval of Convergence 688
 - B Differentiation and Integration 690

Contents

	C	Finding Limits by Using Series	693
	D	Products and Quotients	693
6		Differential Equations	696
7		Power Series Solutions	699
8		Fourier Series	706
	A	Introduction	706
	B	Orthogonality	707
	C	Convergence of Fourier Series	709
9		Applied Fourier Expansions	713
	A	General Intervals	714
	B	Sine and Cosine Expansions	716
	C	Differential Equations	718
10		Heat and Wave Equations	721
	A	One-Dimensional Heat Equation	721
	B	Steady-State Solutions	725
	C	One-Dimensional Wave Equation	728
		Appendix: Finding Indefinite Integrals	735
	I	Identity Substitutions	735
	II	Substitution for the Integration Variable	736
	III	Substitution for a Part of the Integrand	736
	IV	Integration by Parts	737
	V	Integral Table	737
		Answers to Odd-Numbered Exercises	741
		Index	833
